

ESTARREJA

NAUTIC STATION

Ria de Aveiro is our identity. The municipality of Estarreja is tightly connected to the water and at the west side, this territory is entirely bathed by the arms of the Ria. About 26% of the Municipality is part of the Special Protection Zone (ZPE) of Lagoon, of Natura 2000 Network

TRADITION, LAUGH AND NATURE

Here, BioRia was born, a pioneer project for the conservation of nature and biodiversity, which offers 8 walking and cycling routes with about 50km, in direct contact with Nature. We are a birdwatcher's paradise. This one natural sanctuary is home to hundreds of species, where one of the largest nests. European colonies of the majestic Red heron.

In Pardilhó shipyards, traditional boats still born today made of wood, like the moliceiro, by the hands of master naval carpenters. Rice is still sown today in the Baixo Vouga Lagunar, the northernmost part of the Northern Hemisphere where this agricultural culture still persists...

Goals

- 🦢 Affirmation of a nautical tourism destination, in a clear commitment to the cross selling with nature tourism.
- 🦢 Affirmation in inclusion and accessibility through adapted sport.
- 🦢 Create an integrated network of nautical tourism offer, aggregating resources existing and relevant to attracting tourists and involving the components of valuing the natural and cultural heritage, as well as the environment and sustainability.
